

Claims:

1. A polyoxymethylene composition comprising polyoxymethylene, (a) 0.01-3.0% by weight (in the composition, hereinafter likewise) of a steric-hindered phenolic antioxidant, (b) 0.01-1.0% by weight of a compound selected from the group consisting of oxides or carboxylic acid salts of an alkali earth metal and (c) 0.01-1.0% by weight of an ester of a polyhydric alcohol selected from the group consisting of propylene glycol, trimethylol propane and pentaerythritol with a higher fatty acid (C_8-C_{29}).

2. The composition according to Claim 1, wherein said ester (C) is a monofatty acid ester of propylene glycol.

3. The composition according to Claim 1, wherein said ester (C) is an ester in which at least 60 mol% of hydroxy groups of the polyhydric alcohol has been esterified.

4. The composition according to any of Claims 1 to 2, further comprising (d) 0.01-1.0% by weight of a higher fatty acid bisamide compound.
